No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

Sequence 72, Application US/09491577

Patent No. 6610511

GENERAL INFORMATION:

APPLICANT: Yale University

APPLICANT: Carlson, John R.

APPLICANT: Carlson, John R.

APPLICANT: Marr, Coral G.

TITLE OF INVENTION: No. 6610511e1 Family of Odorant Receptor Genes in Drosophila

FILE REFERENCE: 44574-5061-US

CURRENT APPLICATION NUMBER: US/09/491,577

CURRENT APPLICATION NUMBER: US 60/117,132

EARLIER APPLICATION NUMBER: US 60/117,132

SOFTWARE: Patentin Ver. 2.1

SEQIENT SEQIEN NO. 7.
                                                                                                                                                                                                             GENERAL INFORMATION:
APPLICANT: Marc J. Rubenfield et al.
APPLICANT: Marc J. Rubenfield et al.
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS
TITLE OF INVENTION: ARRUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
FILE REPERENCE: 107196.136
CURRENT APPLICATION NUMBER: US/09/252,991A
CURRENT FILING DATE: 1999-02-18
PRIOR PILING DATE: 1998-02-18

Sequence 2, Application US/09194145

Patent No. 6281193

GENERAL INFORMATION:
APPLICANT: STROM, Terry
APPLICANT: STROM, Terry
APPLICANT: MASLINSKI, Wlodzimierz
APPLICANT: MASLINSKI, Wlodzimierz
TITLE OF INVENTION: COMPOUNDS THAT INHIBIT THE BINDING OF RAF-1 OR 14-3-3

TITLE OF INVENTION: PHRAMACEUTICAL COMPOSITIONS CONTAINING SAME
FILE REFERENCE: STROM-1A

CURRENT APPLICATION NUMBER: US/09/194,145

CURRENT PILING DATE: 1999-03-08

EARLIER PILING DATE: 1996-05-22

EARLIER PILING DATE: 1996-05-23

WUMBER OF SEQ ID NOS: 7

SOFTWARE: PatentIn Ver. 2.0

SEQ ID NO 2

LENGTH: 551

Patent No. 6103496

GRUERAL INFORMATION:
APPLICANT: Brash, Alan R
APPLICANT: Bresh, Alan R
APPLICANT: Kim, Richard B
TITLE OF INVENTION: Isolated and Purified 12R-Lipoxygenase Protein and TITLE OF INVENTION: Nucleic Acids
FILE REFERENCE: Attorney Docket No. 6103496 1242-7
CURRENT APPLICATION NUMBER: US/09/087,727A
CURRENT FILING DATE: 1998-05-29
NUMBER OF SEQ ID NOS: 12
SOFTWARE: PatentIn Ver. 2.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Gaps

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                8, 2004, 12:58:43; Search time 13.3 Seconds (without alignments) 62.106 Million cell updates/sec

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Barent No. 5508384

GENERAL INFORMATION:
APPLICANT: Murphy, Randall B.
APPLICANT: Schuster. David I.
TITLE OF INVENTION: POLYPEPTIDES OF G-COUPLED PROTEIN
TITLE OF INVENTION: RECEPTORS, AND COMPOSITIONS AND METHODS THEREOF
NUMBER OF SEQUENCES:
ADDRESSEE: BROWDY AND NEIMARK
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Gaps
                                                                                                                                           Sequence
